How to Turn YouTube Into Passive Income - No Face Required!

A Simple, Introvert Friendly Method Anyone Could Start…

From the Desk of

Mason Junior

YouTube has approximately 1.7 BILLION unique visitors each and every month.

It's the second most popular website in the World, right behind Google (who own YouTube).

And some more interesting facts:

- *81% of internet users have used YouTube.*
- *92% of internet users watch some kind of video content each week.*
- *YouTube ad revenue was $28 billion in 2021.*

The amount of people watching video content all over the World is mind blowing and there is some serious cash to be made right now.

Video Content Is BOOMING Like Never Before

And thousands of people are taking full advantage of it by creating their own YouTube channels.

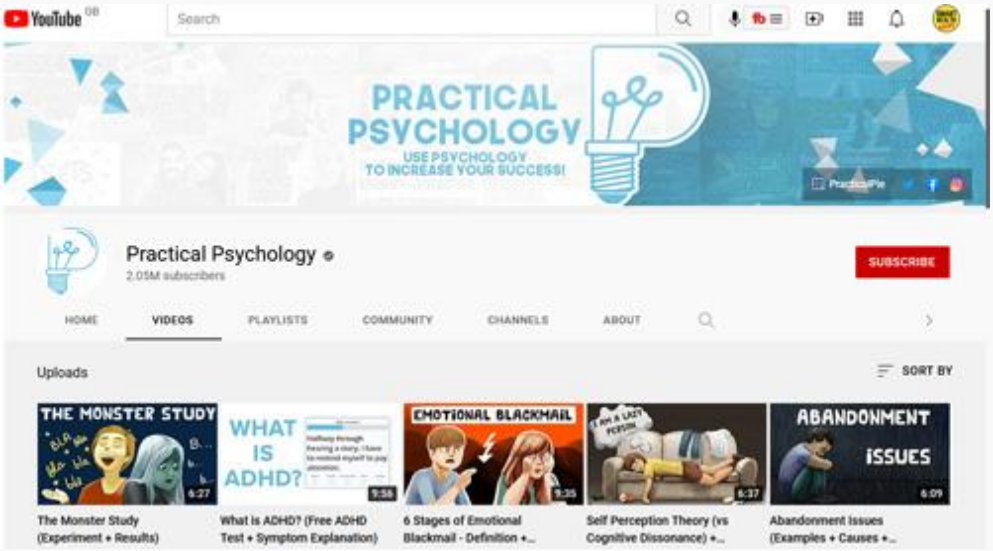

Popular channels can make hundreds of thousands or even millions of dollars every year.

And many of the channels are completely anonymous, so you don't even know who runs them.

These are called 'faceless' channels and can be created by literally anyone.

But Dont Take My Word For It…

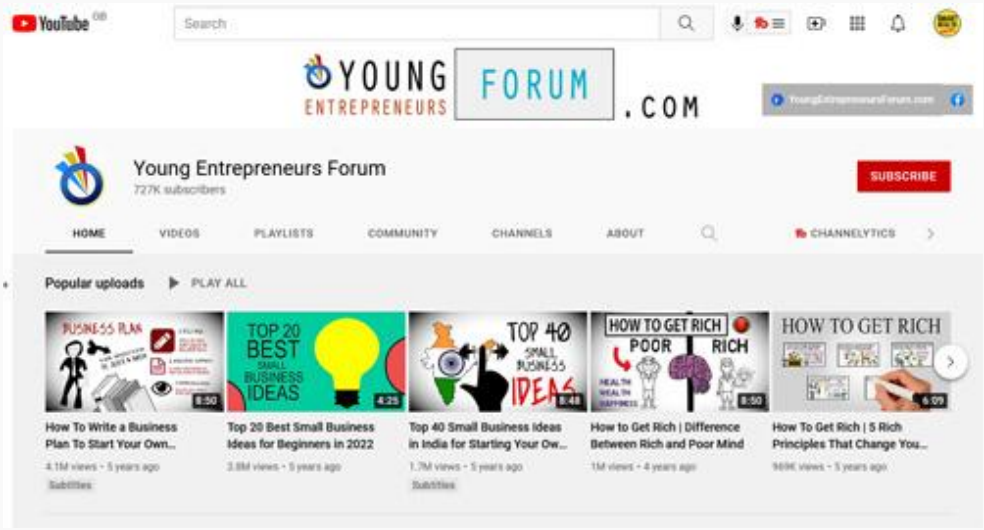

Here's a channel on Psychology:

It has over 2 million subscribers and receives approximately 1.29 million video views each month.

Socialblade estimates the channel is *making up to $5,000 per month*, just in YouTube ad revenue.

Here's a channel on Entrepreneurship:

It has over 727,000 subscribers and receives approximately 523,000 video views each month.

Socialblade estimates the channel is *making up to $2,000 per month*, just in YouTube ad revenue.

Here's a channel on Philosophies:

It has over 754,000 subscribers and receives approximately 1.43 million video views each month.

Socialblade estimates the channel is *making up to $5,500 per month*, just in YouTube ad revenue.

These Everyday People Are Making Thousands Every Month From Their Channels <u>WITHOUT Even Showing Their Faces!</u>

And those are just 3 random examples I happened to come across.

There will be hundreds, even thousands more of these types of channels live right now on YouTube. Each channel gets hundreds of thousands of video views and makes thousands of dollars each and every month.

And the money is completely PASSIVE too.

Once you have built your channel and it's getting daily views, people will watch your videos and you'll make money every single day. Without lifting a finger!

Which brings me onto the topic at hand, *how would YOU like to create your own FACELESS YouTube channel?*

Have your own channel up and running and taking advantage of all those millions of YouTube users.

Introducing...

Faceless YouTube Profits

Faceless YouTube Profits is a straight to the point, no fluff, 22 video training program that will show you how to create a profitable faceless YouTube channel fast.
