There are NO steps left out, and **I'll be teaching you everything from the very beginning.**

This is perfect for you even if you've never created a video in your life!

This is perfect for you even if you've never gotten any traffic!

Seriously... **I'm covering everything....**

Here's just a brief overview of what you'll learn over the course of this entire 5 day workshop...

Day 1: Getting started with YouTube
Before you can begin to get traffic from YouTube you need to understand exactly how it works and exactly what it takes to get traffic from it. It's not **ALL** about branding, great looking videos, etc.

There's so much to it, and you need to see it all from a *"birds eye"* view before you even get started.

By the time you get done with today you'll know how YouTube works to get you traffic and have a complete battle-plan to get all the traffic you can from YouTube.

Day 2: YouTube Channel Creation

So first things first… We've got to create the perfect YouTube channel optimized and branded for the audience we want, and that's exactly what we will be doing today.

I'll show you how to get your channel designed so that it looks good and makes people feel like they've found a *"binge worthy"* channel right off the bat!

This is the foundation of EVERYTHING moving forward, and we need to make sure you've got a super strong foundation!

After today you'll have your very own YouTube Channel and be ready to start loading it with **traffic sucking videos to fuel all of your traffic needs.**

Day 3: Creating Videos For YouTube

This is where most people really get stuck. *What kind of videos do I create? What topics do I create videos on?* And a hundred other questions on creating videos.

Today we're going to talk about what you should be creating for many different strategies you may have in your business.

YES! You need different types of videos for different types of marketing strategies.

I'll also be showing you the tools I use, talking about setting up for recording on camera and screen-cam videos, and so much more.

Basically today is all about giving you all the know-how you need to create the perfect videos for your YouTube channel.

Day 4: YouTube Video Ranking How To

For most of your efforts on YouTube you want to get your videos to rank at the top of the algorithm when people do searches on YouTube.

I'm devoting this entire day to showing you my entire YouTube optimization methods so you can get your videos ranking for keywords you want them to rank for.

If your videos aren't being found in search then you're never going to see much traffic from YouTube at all. **FACT!**

By the time you leave today's class **you'll know what to do every single time you upload a video to YouTube to get it ranking at the top of the results.**

Day 5: The YouTube Traffic Takeover Wrap Up!
At this point you will be armed with all the knowledge you need…

to start taking over YouTube and sucking all the traffic you can from it, but **there's more**.

Today we will be creating a plan together so you can stay focused and consistently publish videos and get traffic from them. We will also be talking about video marketing tactics on YouTube that are beyond just ranking videos on YouTube.

There are many other traffic tactics you can deploy to get even more traffic from YouTube.

After today you will walk away from this workshop with a complete plan to totally take over YouTube and use it as a 24/7 traffic stream to anything and everything you want.

Here's the deal... You don't need to be a YouTube *"rockstar"* to get traffic from YouTube.

This workshop is going to give you all the hands-on training you need to get your YouTube channel set up correctly and have it appeal to the right audience. It's also going to show you how to get all the ideas you need to create all the videos you need to **get the traffic you NEED**.

I've kept everything very simple, so you can actually put this all into action without having to have a ton of techy abilities and expensive equipment.

Bottom line is this is the information you need right now to start using YouTube as a major traffic source for your business.
